Data are given on the lizard specimens of the genus *Bronchocela* (the family Agamidae) of the Vietnam fauna, accumulated in the herpetological collection of the Zoological Museum of Moscow University. The following data are presented for each specimen: the accession number, the date and location of capture, the habitat, and the collector. The places of capture are shown on the map of the country. A new key for the Vietnamese species of *Bronchocela* is provided.

Key words: Vietnam, *Bronchocela*, Agamidae.

Acknowledgements: Field researches in Vietnam during which vast majority of the lizards samples deposited in Herpetological collection of Zoological Museum of Moscow University were collected, were supported by Vietnam-Russian Tropical Scientific and Technological Center.
