

ON ANOMALIES OF THE CAUDAL REGENERATION AND AUTOTOMY  
IN *MEDIODACTYLUS DANILEWSKII* (REPTILIA: SAURIA: GEKKONIDAE)

Received 23 October 2018, revised 4 November 2018, accepted 30 November 2018

The paper presents data on the findings of three Danilewski's gecko (*Mediodactylus danilewskii*) individuals with bifurcations of their regenerated tails in the Karadag Reserve (the southeastern Crimea). Possible causes of such an abnormality are discussed.

**Key words:** Danilewski's gecko, caudal bifurcation, regeneration, autotomy, Karadag Reserve, Crimea.
